Weather person
Landscape Gardener

Important facts to know by the end of this Science Topic:

- Spring is in the months March, April and May; the days start to get longer and a bit warmer.

-Summer is usually in the months June, July and August, the days are at their longest and the weather is the warmest.

-Autumn is usually in the months September, October and November, in autumn the amount of time it is light becomes less which means it gets darker earlier.

-Winter is usually in the months December, January and February, in winter we have colder weather.
